

# AGAT Laboratories Ltd.

## - Company Overview -

### Introduction:

AGAT Laboratories Ltd. was established in 1979 in Calgary, Alberta, Canada as a geological consulting company. Since its inception, AGAT has grown to include seven major business divisions: Environmental, Air Quality Monitoring, Oil and Gas Chemistry, Tribology, Rock Properties, Reservoir Engineering and Agriculture. AGAT has grown to include laboratory locations across Canada.

AGAT's mission is to provide the most precise, accurate and reliable analytical data to their clients. The company practices and promotes professional integrity, safety and environmental awareness in all activities.

### Services:

AGAT Laboratories Ltd. maintains accreditation for specific tests and parameters. Please consult our website or contact your nearest AGAT location for accreditation information.

Services provided include:

- Inorganic Analysis of Soil and Water
- Organic Analysis of Soil and Water
- Occupational Hygiene
- Toxicology
- Microbiology
- Tribology (used oil analysis)
- Ambient Air Quality Monitoring
- Oil and Gas Chemistry

### Value of Service:

AGAT Laboratories Ltd. provides reliable analytical data and is committed to providing an unsurpassed level of client service by offering:

- Competitive pricing
- Complimentary sampling kits
- Bottle drop off & sample pick up\*
- Confirmation of analyses upon sample submission
- On-line database access
- Dedicated Project Managers to manage each project from sample submission to reporting
- Electronic reporting and data transfer in Adobe®, Acrobat® and Microsoft Excel® formats

\* Depending on the drop off and pick up location

### Data Management:

AGAT Laboratories Ltd. has developed an interactive web database that allows the client to manipulate and compare historical data to suit their own needs. The web program is password protected to ensure data is secure and confidential. Clients are able to access their data at any time, from any location.

A few of the features of AGAT's data management allows clients to:

- Search their data based on dates, project numbers, submission numbers, sample numbers or specific analytical criteria.
- Modify or combine reports based on selected criteria.
- Change the regulatory guidelines and generate a revised report. Any exceedance is highlighted on the new report.
- Plot criteria or specific data to allow a visual comparison
