

We are Levelton Consultants Ltd. - a British Columbia and Alberta firm with 40 years of experience delivering comprehensive and integrated services to Clients throughout Canada and the world. With eight locations throughout western Canada, our specialist engineering and scientific services extend over a diverse range from materials engineering, quality assurance, environmental, geotechnical, process and energy technology to building science, metallurgy, cathodic protection and corrosion prevention.

**Full Service Analytical Chemistry Laboratory**

- Full service environmental analysis of soil, water, air and biota.
- Occupational hygiene testing and consulting.
- Drinking water analysis.
- Accredited to ISO 17025 by CAEAL for specific tests listed by CAEAL.

**Air Quality Assessment, Meteorology and Emission Control**

- Emission and Ambient Air Quality Testing
- Meteorology and Climatology
- NPRI and Greenhouse Gas Inventories
- Dispersion Modelling and Impact Assessment
- Emission Control Technology and Option Studies
- Health Impact Assessment

**Energy**

- Performance and Optimization Testing
- Alternative Transportation Fuels and Vehicles
- Biomass Energy System Technology and Options
- Greenhouse Gas Emission Reduction and Management

**Water Quality Assessment**

- Sampling and Analysis of Baseline Water Quality
- Impacts of Wastewater Discharges on Water Quality and Aquatic Habitat
- Hydrology and Stormwater Management

**Site Assessment, Site Remediation and Environmental Audits**

- Property Contamination Assessments & Audits
- Soil and Groundwater Remediation Programs
- Asbestos Abatement Consulting
- Intrusive Environmental Assessments
- Underground Storage Tank Assessments
- Remediation System Design, Project Management, Start-up and Monitoring

**Environmental Regulatory Approvals & Public Consultation**

- License and Permit Applications
- Environmental Impact Assessments and Regulatory Applications
- Public Consultation support

**Construction Materials, Geotechnical Engineering and Building Science**

- Construction Materials
- Consulting for Structure Repair and Rehabilitation (Bridges, Parking Garages)
- Geotechnical Investigations and Foundation Design Specifications
- Roofing Design and Inspections by RCABC and RRO Approved Inspectors
- Materials Testing, Inspection and QA/QC Programs for Major Projects
- Nondestructive Testing (Sonic and GPR)
- Slope Stability and Failure Assessments
- Building Science Consulting:
  - Building Envelope Condition Assessments (BECA)
  - Computer Analysis and Design of Wall Assemblies
  - Below-Grade Waterproofing

**Metallurgy and Corrosion Prevention**

- Failure Analysis and Forensic Engineering
- Corrosion Engineering, Corrosion Control and Inspection of Coating Systems
- Cathodic Protection Systems
