## CONSULTING ENGINEERS

DST Consulting Engineers Inc. is a firm of engineers, scientists and contractors with offices across Ontario. Established in 1971, DST specializes in construction materials services, geotechnical engineering and environmental services.

DST maintains CCIL Type A, B, C, D and E certified laboratories for asphalt and aggregate quality assurance, and quality control testing. Their asphalt laboratory is capable of completing and verifying both Marshall and Superpave mix designs. DST also has CSA certified testing laboratories and technicians to complete concrete field/laboratory testing and mix designs, as well as RMCAO certified engineers to complete concrete plant certifications. DST's field inspection services include compaction, aggregates, concrete, structural and reinforcing steel, wall and roof membranes, fireproofing and masonry.

DST's consulting services include pavement design and evaluation, geotechnical services for foundations, aggregate source investigations/permitting, indoor air quality services, sustainable construction services, demolition design, blast monitoring and design, environmental studies, hydrogeological investigations and environmental site assessments.

DST's contracting services include vertical and horizontal drilling, environmental site remediation and ground stabilization. The latter includes drilled anchors, micropiles and a patented soil nail and root technology (SNART) for stabilizing slopes.
