

The Ontario Hot Mix Producers Association was formed in 1974 to provide a voice for hot mix asphalt producers on all asphalt related subjects that affect the industry or the businesses of member companies.

Members represent almost all of the producers across Ontario and a solid core of supportive manufacturers and suppliers. OHMPA is also the voice of the Ontario Asphalt Cement Suppliers who participate in the Association as full active members.

Dedicated to excellence in asphalt pavements

As the centralized voice for the asphalt industry, OHMPA is dedicated to excellence in asphalt pavements. It does this by:

- Promoting hot mix asphalt pavements in Ontario.
- Promoting health and safety best practices and educating members on health and safety regulations for all aspects of hot mix asphalt production and laydown.
- Promoting environmental responsibility and educating our members on environmental regulations.
- Promoting standards of quality in all aspects of hot mix asphalt production and hot mix asphalt pavement design and construction.
- Promoting the highest standards of business practice amongst members.
- Liaising with governments, technical specifiers, related associations and other customers on matters directly affecting the industry.
- Educating and assisting members on matters involving the production, laydown and testing of hot mix asphalt products.
- Providing support for the research and development of hot mix asphalt and asphalt pavements.
