

Testing. Advising. Assuring.

Exova Company Profile

With 30 years industry experience, Exova is one of the most respected testing services companies in the world. Our people are specialists who live and breathe the industries we serve –agriculture to aerospace, pharmaceuticals to polymers –everything we do is aimed at improving our customers’ business outcomes through testing services.

Testing for the World

Our international testing business serves local markets in a wide range of industries with facilities reaching out to every corner of the globe. We specialize in four areas:

- Materials Testing
- Certification
- Advising and Consulting
- Engineering and Technology

We have over 136 strategically located facilities including 100 accredited laboratories staffed by an exceptional workforce of scientists, engineers, chemists and materials specialists.

Our Approach

The world over, Exova makes a global impact, touching peoples’ lives each and every day. Whether it’s food processes, textile manufacture, car, plane or train engines or the steel that supports pipelines and bridges, Exova is there, testing and analyzing products large and small in state-of-the-art facilities. In fact, it’s hard to think of something we haven’t tested in some way to make the world a better and safer place.

This is thanks in large part to our staff and their unrivalled expertise. Exova’s scientists and engineers are without doubt, the best in the testing industry. With over 4000 employees operating in 21 countries around the world, these exceptional experts work as a team. Through their collaboration and combined knowledge, Exova is able to deliver beyond our customers’ expectations.

We exceed customer expectations through our global network, which serves local markets around the world. Exova provides national and international industry standard tests through an expansive network of laboratories and testing facilities located close to the industries they serve, predominantly through Europe, North America and the Middle East.

Our network allows us to transfer knowledge and deliver global best practice, locally. Our collaborative approach helps to advance collective learning and pushes the limits of what can be achieved for our customers in each and every location.
