

PROCEDURE

1. Determine the BRD of dense bituminous paving mixture using LS262?
2. Determine the MRD of this mixture using LS264?
3. Calculate the percent air voids?

$$\text{Percent Air Voids} = \frac{J - C}{J} \times 100$$

where: J = MRD of the bituminous mix
C = BRD of the compacted mix

4. Report results to one decimal place

[Fill in Y for Yes - N for No - NA for not applicable (**NOTE:** N or NA requires comments)]
