

Corporate Profile

Fisher Scientific established in 1926 and located in over 145 countries is a major provider of instruments, equipment and other products to the Canadian scientific community. We provide more than 250,000 products and services to research centers, health care, and educational and industrial customers nationwide. We serve scientists engaged in biomedical, biotechnology, pharmaceutical, chemical and other fields of research and development, and we are a supplier to clinical laboratories, hospitals, health care alliances, environmental testing centers, quality-control laboratories and many other customers.

As one of Canada's most technologically advanced laboratory and industrial safety products supplier, Fisher Scientific has achieved a remarkable record. We've been able to attract and retain the best people, maintain unique and often exclusive relationships with the world's best suppliers, and earn the loyalty of our customers. Exceeding your customer service expectations with a combination of the best people and the latest technologies has been and will always be our central focus.

Fisher has held ISO Certifications since the early 1990's.

Our new ISO 9001 Certification has permitted us to improve internal processes, provide better training to our staff, and establish excellent relations with vendors/customers. Going forward it will help us to focus on our customers' needs through continual improvement and the setting of quality objectives.

Fisher Scientific Canada achieved ISO 9001:2000 certification in January 2005. This ISO covers our complete business cycle (selection of vendors, distribution, and service/repair). As a quality focused company, you can be confident that Fisher Scientific is committed to the delivery of high quality products and services. Customer Satisfaction and Continual Improvements are of the utmost importance to us!
