

An event you don't want to miss!

CCIL's AGM luncheon

May 1, 2023

Sheraton Toronto Airport Hotel & Conference Centre

Keynote speech by Stephen Beatty

As CCIL looks back in celebration of its 30th Anniversary, it is also looking ahead to help members prepare for the challenges and opportunities of the next 30 years.

What will the future bring that will fundamentally impact the private-sector laboratory testing companies?

What can we expect from technologies such as AI, driverless cars, and drones; new construction materials; greater reliance on P3s to fund infrastructure; population migration and densification of cities; increasing environmental regulation in response to climate events; growing emphasis on recycling and more sustainable construction practices; and other changes likely to alter our members' businesses?

To better understand these megatrends, CCIL is excited to announce that **Stephen Beatty** will be the keynote speaker at its AGM luncheon this year.

Stephen is a well known and highly respected expert on these issues. Based in Toronto, he currently serves as the Global Head of Infrastructure and the Head of Global Cities Center of Excellence for KPMG. He has over 35 years' experience and has worked on assignments in more than 50 countries, advising clients on a wide range of issues including infrastructure, energy, trade, transportation, and health policy.

All CCIL Members are invited to this important luncheon event, but space is limited and reservations are required. Don't miss out! To confirm your attendance, contact CCIL now:
