AB and YT Asphalt Laboratory Certification Programs (Updated 2025 May)

1. Basic Asphalt Certification, Asphalt Mix Compliance - Marshall Method (Type B)	ASTM/AASHTO/ATT/A
Compulsory: Partial Mix Compliance	
reparation of Asphalt Mixture Specimens Using Marshall Apparatus	D6926
ulk Specific Gravity and Density of Non-Absorptive Compacted Asphalt Mixtures	D2726
ulk Specific Gravity and Density of Compacted Asphalt Mixtures Using Coated Samples (if required) Or	D1188
ulk Specific Gravity and Density of Compacted Asphalt Mixtures Using Automatic Vacuum Sealing Method (if required)	D6752
ercent Compaction, Asphalt Concrete Pavement	ATT-67
ercent VMA in Compacted Mixture	MS-2
Optional: Full Mix Compliance - No Additional Fees	•
neoretical Maximum Specific Gravity and Density of Bituminous Asphalt Mixtures	D2041
ercent Air Voids in Compacted Asphalt Mixtures	D3203
arshall Stability and Flow of Asphalt Mixtures	D6927
AC Determination - Select at least one of the two methods	•
uantitative Extraction of Asphalt Binder from Asphalt Mixtures	D2172
sphalt Content of Asphalt Mixture by Ignition Method	D6307
Gradation of Extracted Aggregate	
echanical Size Analysis of Extracted Aggregate	D5444
Additional Asphalt Certification Programs	•
2. Asphalt Mix Compliance Laboratory Superpave Method (Type B)	
Must also participate in ALL of the Compulsory and Optional Mix Compliance Asphalt Certification, Number 1 above	
reparing & Determining the Density of Asphalt Mixture Specimens by Means of the Superpave Gyratory Compactor	T312
ulk Specific Gravity and Density of Non-Absorptive Compacted Asphalt Mixtures	D2726
heoretical Maximum Specific Gravity and Density of Bituminous Asphalt Mixtures	D2041
ercent Air Voids in Compacted Asphalt Mixtures	D3203
Number 1 above educing Samples of Aggregate to Testing Size	C702
linerals Finer than 75-µm (No.200) Sieve in Mineral Aggregates by Washing	C117
ieve Analysis of Fine and Coarse Aggregates	C136
elative Density (Specific Gravity) and Absorption of Coarse Aggregate	C127
elative Density (Specific Gravity) and Absorption of Fine Aggregate	C128
lat Particles, Elongated Particles, or Flat and Elongated Particles in Coarse Aggregate	D4791
letermining the Percentage of Fractured Particles in Coarse Aggregate	D5821
ffect of Moisture on Asphalt Mixtures	D4867
4. Asphalt Mix Design Laboratory Superpave Method (Type A) Must also participate in ALL of the above tests, Numbers 1, 2 and 3 above	
hort-Term Laboratory Conditioning of Asphalt Mixtures	R30
uperpave Volumetric Design for Asphalt Mixtures	R35
ffect of Moisture on Asphalt Mixtures	D4867
and Equivalent Value of Soils and Fine Aggregate	D2419
ncompacted Void Content of Fine Aggregate	C1252
	T305
etermination of Draindown Characteristics in Uncompacted Asphalt Mixtures (if required)	
betermination of Draindown Characteristics in Uncompacted Asphalt Mixtures (if required) 5. Laboratories Carrying Out Penetration Testing of Recovered Asphalt Cement (Type E) Must also participate in ALL of the Basic Asphalt Certification, at least Number 1 above	
5. Laboratories Carrying Out Penetration Testing of Recovered Asphalt Cement (Type E) Must also participate in ALL of the Basic Asphalt Certification, at least Number 1 above	D5
Laboratories Carrying Out Penetration Testing of Recovered Asphalt Cement (Type E) Must also participate in ALL of the Basic Asphalt Certification, at least Number 1 above enetration of Bituminous Materials	D5 D1856
Laboratories Carrying Out Penetration Testing of Recovered Asphalt Cement (Type E) Must also participate in ALL of the Basic Asphalt Certification, at least Number 1 above enetration of Bituminous Materials ecovery of Asphalt from Solution by Abson Method Or	
5. Laboratories Carrying Out Penetration Testing of Recovered Asphalt Cement (Type E) Must also participate in ALL of the Basic Asphalt Certification, at least Number 1 above enetration of Bituminous Materials ecovery of Asphalt from Solution by Abson Method Or ecovery of Asphalt Binder from Solution Using the Rotary Evaporator 6. Laboratories Testing Performance Graded Asphalt Cement (Type F) Unless the laboratory is dedicated to binder testing ONLY, it must also participate at least in the Basic	D1856
5. Laboratories Carrying Out Penetration Testing of Recovered Asphalt Cement (Type E) Must also participate in ALL of the Basic Asphalt Certification, at least Number 1 above enetration of Bituminous Materials ecovery of Asphalt from Solution by Abson Method Or ecovery of Asphalt Binder from Solution Using the Rotary Evaporator 6. Laboratories Testing Performance Graded Asphalt Cement (Type F) Unless the laboratory is dedicated to binder testing ONLY, it must also participate at least in the Basic Asphalt Certification, Number 1 above	D1856 D5404
5. Laboratories Carrying Out Penetration Testing of Recovered Asphalt Cement (Type E) Must also participate in ALL of the Basic Asphalt Certification, at least Number 1 above enetration of Bituminous Materials ecovery of Asphalt from Solution by Abson Method Or ecovery of Asphalt Binder from Solution Using the Rotary Evaporator 6. Laboratories Testing Performance Graded Asphalt Cement (Type F) Unless the laboratory is dedicated to binder testing ONLY, it must also participate at least in the Basic Asphalt Certification, Number 1 above ffect of Heat and Air on a Moving Film of Asphalt Binder (Rolling Thin-Film Oven Test)	D1856 D5404 T240
5. Laboratories Carrying Out Penetration Testing of Recovered Asphalt Cement (Type E) Must also participate in ALL of the Basic Asphalt Certification, at least Number 1 above enetration of Bituminous Materials ecovery of Asphalt from Solution by Abson Method Or ecovery of Asphalt Binder from Solution Using the Rotary Evaporator 6. Laboratories Testing Performance Graded Asphalt Cement (Type F) Unless the laboratory is dedicated to binder testing ONLY, it must also participate at least in the Basic Asphalt Certification, Number 1 above ffect of Heat and Air on a Moving Film of Asphalt Binder (Rolling Thin-Film Oven Test) irading or Verifying the Performance Grade (PG) of an Asphalt Binder	D1856 D5404 T240 R29
5. Laboratories Carrying Out Penetration Testing of Recovered Asphalt Cement (Type E) Must also participate in ALL of the Basic Asphalt Certification, at least Number 1 above enetration of Bituminous Materials ecovery of Asphalt from Solution by Abson Method Or ecovery of Asphalt Binder from Solution Using the Rotary Evaporator 6. Laboratories Testing Performance Graded Asphalt Cement (Type F) Unless the laboratory is dedicated to binder testing ONLY, it must also participate at least in the Basic Asphalt Certification, Number 1 above ffect of Heat and Air on a Moving Film of Asphalt Binder (Rolling Thin-Film Oven Test) trading or Verifying the Performance Grade (PG) of an Asphalt Binder ccelerated Aging of Asphalt Binder Using a Pressurized Aging Vessel (PAV)	D1856 D5404 T240 R29 R28
5. Laboratories Carrying Out Penetration Testing of Recovered Asphalt Cement (Type E) Must also participate in ALL of the Basic Asphalt Certification, at least Number 1 above enetration of Bituminous Materials ecovery of Asphalt from Solution by Abson Method Or ecovery of Asphalt Binder from Solution Using the Rotary Evaporator 6. Laboratories Testing Performance Graded Asphalt Cement (Type F) Unless the laboratory is dedicated to binder testing ONLY, it must also participate at least in the Basic	D1856 D5404 T240 R29
